DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 – 7, 11 – 17, 21 – 27 and 31 – 37 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Pat. No. 5,949,415 to Lin et al.

As to claim 1, Lin teaches an Interface (Graphical User Interface 3 Col. 3 Ln. 1 – 67), an Application Unit (Client Computer 1 Col. 3 Ln. 1 – 67), a plurality of operations (Task 6/7 Col. 3 Ln. 1 – 67), a Target Application (Operating System 2 Col. 3 Ln. 43 – 57), a Monitoring Unit (Program Monitor 4 Col. 3 Ln. 11 – 67), a Log (Local Record File 5 Col. 3 Ln. 11 – 24), a Dynamic Linked Library (“...DLL...” Col. 3 Ln. 58 – 67, “...TOOLHELP.DLL...” Col. 4 Ln. 36 – 48) and a Communication Unit (Communication Link 9 Col. 3 Ln. 11 – 42).

As to claim 2, Lin teaches a Display Screen (Graphical User Interface 3 Col. 3 Ln. 1 – 67).

As to claim 3, claim 1 covers claim 3 except for an image forming device. Lin teaches an Image Forming Device (“...television...” Col. 3 Ln. 25 – 28).

As to claim 4, see the rejection of claim 3.

As to claim 5, Lin teaches sending the log of the monitored when the user exits the target application (“...Endtime...” Col. 6 Ln. 11 – 32).

As to claim 6, Lin inherently teaches sending the log of monitored data every two or more sessions because the monitored data could be sent to the server on a “period basis” (Col. 6 Ln. 33 – 45).

As to claim 7, see the rejection of claim 6.

As to claims 11 – 17, see the rejection of claims 1 – 7 respectively.

As to claims 21 – 27, see the rejection of claims 1 – 7 respectively.

As to claims 31 – 37, see the rejection of claims 1 – 7 respectively.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8,9,18,19, 28,29,38,39 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 5,949,415 to Lin et al. in view of U.S. Pat. No. 6,615,258 B1 to Barry et al.

As to claim 8, Lin is silent with reference to the storing data in a form of a map with a key and data value as string data.

Barry teaches storing data in a form of a map with a key and data value as string data (“...key...vector...” Col. 41 Ln. 65 – 67, Col. 42 Ln. 1 – 13). It would have been obvious

Art Unit: 2126

to apply the teaching of Barry to the system of Lin. One would have been motivated to make such a modification to provide navigational behavior of the question tree (Col. 42 Ln. 10 – 13).

As to claims 9,18,19,28,29,38 and 39 see the rejection of claim 8.

As to claims 41 – 48, see the rejection of claims 1 and 8.

Claims 10,20,30 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 5,949,415 to Lin et al. in view of U.S. Pat. No. 6,163,803 to Ken Lin et al. (hereinafter referred to as Ken Lin).

As to claim 10, Lin is silent with reference to the communication unit communicating the monitored data as Internet mail.

Lin Ken teaches the communication unit as communicating the monitored data as Internet mail (“...e-mail...” Col. 3 Ln. 12 – 22). It would have been obvious to apply the teaching of Lin Ken to the system of Lin. One would have been motivated to make such a modification to exploit the universality of e-mail.

As to claims 20, 30 and 40, see the rejection of claim 10.
